Course

1. How would you rate the success of the course in accomplishing its objectives as stated on the course syllabus? *

○ Excellent

○ Very Good

◉ Satisfactory

○ Less Than Satisfactory

○ Very Poor

○ No Answer

2. How would you rate the use of class time (lectures, discussions, demonstrations, labs, studio work, etc.) to promote your learning? *

○ Excellent

○ Very Good

◉ Satisfactory

○ Less Than Satisfactory

○ Very Poor

○ No Answer

6. In what ways has this course made you think differently or more deeply? Please provide examples.

This course has made me think more deeply about why certain medical instruments are designed the way they are, most notably methods of filtering and amplification. The mathematical derivations helped understand why passive and active filters worked the way they did. Although the lab demonstration days came with many technical issues, it has made me think more deeply about how breadboards are structured and what circuits physically look like (I've only really dealt with the theoretical drawings in the past).

7. What aspects of this course worked best to facilitate your learning?

8. What suggestions do you have for improving this course?

I think the pacing of the course could have been better maintained; I was looking forward to learning more about digitization but we unfortunately did not have the time. I also think having practice problems that more closely matched the difficulty of the exams would have helped with preparation.

○ Satisfactory

○ Less Than Satisfactory

○ Very Poor

○ No Answer

16. Please provide any additional comments regarding the instructor.

Very kind and willing to help. She is very communicative, reaching out to individual students to provide information relevant to them when appropriate, which is very helpful!
Could be more organized about logistical things - exams were almost never released as promised, often due to technical issues. The lecture schedule on Canvas also became out of date really quickly and was not maintained.

Facilities

17. How would you rate the space in which instruction occurred (classrooms, laboratories, etc.)? *

○ Excellent
